Listing of Claims:

5 1. (Currently Amended) A system for displaying an image at its selected size, wherein said image is configured for printing by a large format printer, said system comprising:

 a terminal for displaying a plurality of images, said terminal including an image program for enabling the display of at least one of said
10 images on said terminal, said image program being configured to enable the selection of a plurality of attributes of said image, wherein said selection of said plurality of attributes includes at least one option for selecting large format dimensions for said image; and

 a projection device for projecting said image according to said
15 selected, large format dimensions, such that said image is projected at its selected, large format dimensions.

2-3. (Canceled)

20 4. (Previously Presented) The system according to claim 1, wherein said terminal enables the selection of a mounting background for projecting with said image.

5. (Previously Presented) The system according to claim 4, wherein said terminal further enables the selection of color and dimensions for said mounting background and wherein said projection device is operable to project a mounting background image according to said selected color and dimensions of said mounting background.

6. (Previously Presented) The system according to claim 4, wherein said terminal enables the selection of a mounting position for said image on said mounting background.

7. (Previously Presented) The system according to claim 6, wherein said projection device is operable to project said image according to said selected mounting position with respect to said mounting background.

8. (Original) The system according to claim 1, wherein said terminal further comprises an aesthetic engine program for providing decorator information.

9. (Previously Presented) The system according to claim 1, further comprising a printer operable to produce a printed version of said image.

10. (Previously Presented) The system according to claim 9, wherein said printer is a large format printer operable to print said image on a print medium having at least an A3 size.

11. (Currently Amended) A method for displaying an image at its selected size and printing said image, said method comprising the steps of:

displaying at least one selectable image on a terminal;

5 displaying a plurality of attribute options for said at least one selectable image on said terminal, wherein one of said attribute options includes large format dimensions for ~~said a~~ selected image;

projecting said selected image according to its selected, large format dimensions on a viewing surface; and

10 printing said selected image on a print medium having at least an A3 size on a large format printer.

12. (Currently Amended) The method according to claim 11, wherein said attribute displaying step further comprises the steps of:

15 displaying frame options, wherein said frame options include a plurality of frames and frame dimensions; and

projecting ~~said a selected~~ frame and said selected image in ~~their~~ said selected, large format dimensions on said viewing surface.

20 13. (Currently Amended) The method according to claim 12, wherein said attribute displaying step further comprises the steps of:

displaying matte options, wherein said matte options include a plurality of matte colors and matte dimensions, and wherein said matte is

options are configured for placement between said selected image and said selected frame; and

projecting said selected frame, said selected image, and said a selected matte in ~~their~~ selected sizes on said viewing surface.

5

14. (Currently Amended) The method according to claim 11, wherein said attribute displaying step further comprises the steps of:

displaying mounting background options, wherein said mounting background options include mounting background color and dimensions; and

10 projecting said selected image and said a selected mounting background in ~~their~~ said selected, large format dimensions and selected colors on said viewing surface.

15 15. (Currently Amended) The method according to claim 14, wherein said attribute displaying step further comprises the steps of:

displaying mounting position options, wherein said mounting position options include mounting positions for said selected image on said selected mounting background; and

20 projecting said selected image according to said a selected mounting position on said selected mounting background on said viewing surface.

16. (Original) The method according to claim 11, further comprising the step of:

displaying decorator information according to said selected image.

17-23. (Canceled)

5

24. (Currently Amended) An apparatus comprising:

means for enabling selection of dimensions of a printable image;

means for projecting the printable image at the selected dimensions with an image of at least one of a matte and a frame; and

10 means for printing the printable image at the selected dimensions.

25. (Previously Presented) The apparatus of claim 24, further comprising means for enabling alteration of the selected dimensions.

15 26. (Previously Presented) The apparatus of claim 24, further comprising means for enabling selection of attributes of the matte or frame image.

27. (Previously Presented) The apparatus of claim 26, wherein the
20 attributes comprise a color.

28. (Previously Presented) The apparatus of claim 26, wherein the attributes comprise dimensions.

29. (Currently Amended) The apparatus of claim 26, wherein the means for projecting comprises means for projecting the matte or frame image having ~~the~~ a selected attribute.

5 30. (Previously Presented) The apparatus of claim 24, wherein the means for projecting comprises means for projecting the printable image with the matte image.

10 31. (Previously Presented) The apparatus of claim 24, wherein the means for projecting comprises means for projecting the printable image with the frame image.

15 32. (Previously Presented) The apparatus of claim 24, wherein the means for projecting comprises means for projecting the printable image with the matte image and the frame image.

 33. (Previously Presented) The apparatus of claim 24, wherein the means for projecting comprises means for projecting the printable image with a mounting background image.

20

 34. (Previously Presented) The apparatus of claim 33, wherein the mounting background image simulates a physical structure.

35. (Previously Presented) The apparatus of claim 33, further comprising means for enabling selection of attributes of the mounting background image.

5 36. (New) A method comprising:
enabling selection of an image;
enabling selection of large format dimensions;
projecting, responsive to receiving selection of the image and the large
format dimensions, the selected image at the selected large format dimensions;
10 and
printing the selected image at the selected large format dimensions.

37. (New) The method of claim 36, wherein the selected large format dimensions are greater than dimensions of A3 print medium.

15

38. (New) A system comprising means for performing the method recited in claim 36.

39. (New) An apparatus comprising:
20 a terminal capable of enabling selection of an image and selection of large format dimensions;
a projection device capable of projecting the image at the large format dimensions; and

a large format printer capable of printing the image at the large format dimensions.
